

Python Basics

SQL → Databases

Python → General Purpose
→ System Programming
→ GUI
→ Scripting
→ Automation

Python → Guido van Rossum (91)
Current version is 3.x

- ✓ Open Source → Source code is available
- Interpreted language

→ Can be read by you
& modified & distributed

Any language

English → I/O

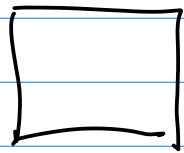

① Compiled → C, C++

② Interpreted → python, javascript
↓
operates cmd by cmd

Python → Community Driven
→ Many Libraries available
Networking, data Science

WORA

→ Write Once Run Anywhere

→ Any Platform

Windows
32 bit

OS, hardware
Linux, 64 bit...
Mac

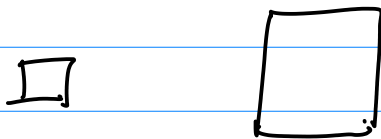

Src → Independent of Platform
Interpreter is dependent on platform

Python dynamically typed language

~~var = data~~ var_name = data

Linux → Python

Windows → Install (python.org)

Text editor, python interpreter

↓
[notepad] → extensions
[VS code] → Syntax highlighting

IDE → Integrated Development
Environment

package
[Text editor, interpreter...]

python → basic IDE
IDE
